Skills

- ML | DL | NLP | GenAI | PyTorch | TensorFlow | LangChain | Azure | AWS | Databricks | HuggingFace
- Python | PySpark | FastAPI | RestAPIs | Unit testing | PostgreSQL | NoSQL | Git | Docker
- Problem Solving | Communication | Teamwork | Creativity | Fast Learning | High Responsibility | Persistence

Experience

Lead Data Scientist

[DigitalFox](#)*10/2025 - Present*

- My role focuses on driving AI adoption and readiness across the organization. I shape our strategy, define where AI genuinely moves the needle, and build scalable, production-ready systems that prove their value in the real world. I connect the technical work with the business goals, turning ideas into solutions that improve decision-making, streamline operations, and open new capabilities for the team.

Data Scientist

[:IWConnect](#)*07/2023 - 10/2025*

- Consulted clients across different industries (telecom, e-commerce, retail, pharma, and manufacturing) on AI topics, **leading pre-sales** demos, **building POCs**, and converting them into long-term contracts by presenting innovative AI solutions to **C-level stakeholders**.
- Recognized with the **Rising Star Award** for impact and client success. Published research articles, delivered presentations, and contributed to thought leadership within the company.
- Led and mentored students and interns in a 9-month program that produced a time-series forecasting platform for S&P 500 companies, leveraging global/industry signals and **fine-tuned** transformer models (Chronos) for short- and long-term forecasts.

AI Intern

[Aldea Lab](#)*06/2021 - 09/2021*

- Worked on **real-life** projects, learning from experts with over **10 years** of industry **experience**.

Education

Master of Science

[University "St. Cyril and Methodius"](#) *Macedonia**10/ 2023 – Present*

- Major in Data Science
